Morse code decoder

1. Run the cell.
2. Enter Morse Code sequence with space provided.

Enter your Morse Code sequence here:

Single character should be spaced with * and word should be
spaced with ***. (e.g. 000 = one single character, 000*000 = a word
with two characters, 000*000***000 = 2 words, which the first
word has two characters and the second word has one character.)
3. Press enter button after finish entering the sequence to decode.
4. After entering all the inputs, type theend! to end the input section.
